Customized technology
for UNIQUE AGVs offering
targeted expertise and
leading to concrete
solutions for indoor and
outdoor use.

TAILOR-MADE AGVS

PROXAUT, tailor-made AGVs for unique solutions

Proxaut is specialized in the **design and development of automatically guided vehicles** for a wide range of sectors. **Since 1996, we have designed unique AGVs** following the same pioneering spirit that has always characterized our work.

Headquartered in Italy between the **Motor Valley** and **Packaging Valley**, two districts renowned worldwide for their recognized **passion for engines, mechanical expertise**, Proxaut represents a reliable partner with an additional value.

Responding to the specific needs of customers offering **targeted expertise** which leads to **tailor-made solutions is the mission of Proxaut**. Caring about the **aesthetics and design** of the machine and the **workplace and employ-**

ee safety, is always a **priority**. Proxaut **provides sales and service globally**. With hundreds of installations, **we support our customers** with the right equipment, solutions and software systems **to increase their level of automation**. Further production support is available through the Middleby worldwide network of brands and representatives after its acquisition in June 2022 by the Middleby Corporation (NASDAQ: MIDD) www.middleby.com

Our AGVs offer concrete solutions to serve **more than 30 different sectors** (food & beverage, automotive, metal industry, paper & tissue, textile & nonwovens, glass, biomedical & pharmaceutical, packaging, aerospace, pet food, etc...).

With more than **600 AGVs designed, manufactured and delivered for indoor and outdoor**

use (no ATEX), with temperatures even below 0°C., our vehicles are fully equipped with the **highest safety standards** and **EU-certified** (UL/CSA on request) and they can move easily on many different types of floors.

We **meet the requirements of different markets and sectors** with our laser-guided or combined driving **AGV vehicles**. Typically used to **lift pallets**, our AGVs are the **ideal solution** to meet customers' **handling and storage needs**. We make **standard models** with front, bilateral and trilateral forks, which can be used in even the tightest spaces (VNA). We make **special models**, including side-up models, with bucket or forks, AGVs with single rod, double rod, clamp, or a variety of custom designed features.

We increase productivity by automating our customers' plants

with indoor and outdoor **AGV Shuttles**. These vehicles are the ideal solution to **replace traditional fixed transport** systems, **gaining in flexibility and configuration** of the entire production cycle. Equipped with an **adaptable and customizable loading platform** and **different types of covers**, they connect seamlessly to production lines, robotic islands or packaging lines, allowing **different types of products** to be handled. 🏢
